

Job opening: Magnetoencephalography (MEG) expert

FieldLine Inc., Boulder CO, USA - www.fieldlineinc.com

FieldLine Inc. is a biotech startup located in Boulder, Colorado developing magnetoencephalography (MEG) systems based on optically-pumped magnetometers (OPMs). Our dedicated, collaborative, and fun team is looking to hire an MEG expert to aid our development. Specifically, this position includes the analysis of MEG data for diagnostic purposes and further development of tools to improve source localization with OPMs. Experience with current MEG software, preferably MNE, is essential. In addition, this position requires interfacing with customers and collaborators, planning and organizing MEG measurements, and OPM sensor and system characterization. Communication, collaboration, and organizational skills are required for this. FieldLine supports diversity and encourages women and minorities to apply.
